

e-balance

Energizing for Equilibrium

Imagine yourself at the seaside or in the mountains, feeling the revitalizing power of nature. If you ever experienced this marvellous sensation of natural energy and equilibrium, you already know e-balance. This treatment made with the precious help of bioceramics (natural minerals) allows us to bring nature into the room. By means of friction, the bioceramics release minus ions, similar to the ones existing in fresh/clean atmospheres. Their interaction with positive ions accomplish a state of energy balance. This is a big step to wake up completely revitalized.

- Leads an individual mental status in a stable direction;
- Effective in tiredness recoveries;
- Promotes a healthy maintenance of metabolism;
- Improves blood circulation.
